

Hexagonal hook masses

Hook masses of different weight with hexagonal shape.

School level

Senior high school.

Technical features

Steel masses of different weights
2 hooks on lower and upper parts
Dimensions: from 27x9mm to 50x35mm
Weight: from 5 to 200 g
Packaging: sachet.

Hexagonal hook masses

DM232010	Hexagonal hook mass 5g.
DM232011	Hexagonal hook mass 10g.
DM232012	Hexagonal hook mass 20g.
DM232013	Hexagonal hook mass 50g.
DM232014	Hexagonal hook mass 100g.
DM232015	Hexagonal hook mass 200g.

Product advantages

- The hooks make the **hanging up easier**.
- **All components can be sold separately**.

Examples of experiments

- Study of moments and forces.

Associated products

Erasable magnetic board 600 x 900 – **DM230024**
Erasable magnetic board 600 x 400 – **DM230025**
Circular dynamometer 1N – **DM231001**
Briefcase MECAPRO – **DM233008**
Shape on magnet – **DM230023**
Pulley on magnet – **DM230012**

EXPERIMENTS

Use on magnetic board with circular dynamometer
