

DO108022

Kit geometric optics

Magnetic accessories for optics experiments.

School level

Junior and senior high schools.

Technical features

- 14 magnetic lenses
- 1 magnetic mirror
- 7 erasable boards 250x350mm
- Human eye, camera, optical disk, grid,
- Galilean telescope, Keplerian telescope, Newton telescope.
- 4 magnets $\varnothing 32.6\text{mm}$
- 1 erasable pen
- 1 suitcase with protection foam
- Weight: 1.100 kg
- Dimensions: 370x310x80 mm
- Packaging: suitcase.

Product advantages

- Different optics experiments **in one product**.
- **Quick storage**.
- Included in the range **"KITS GEOMETRIC OPTICS"**.

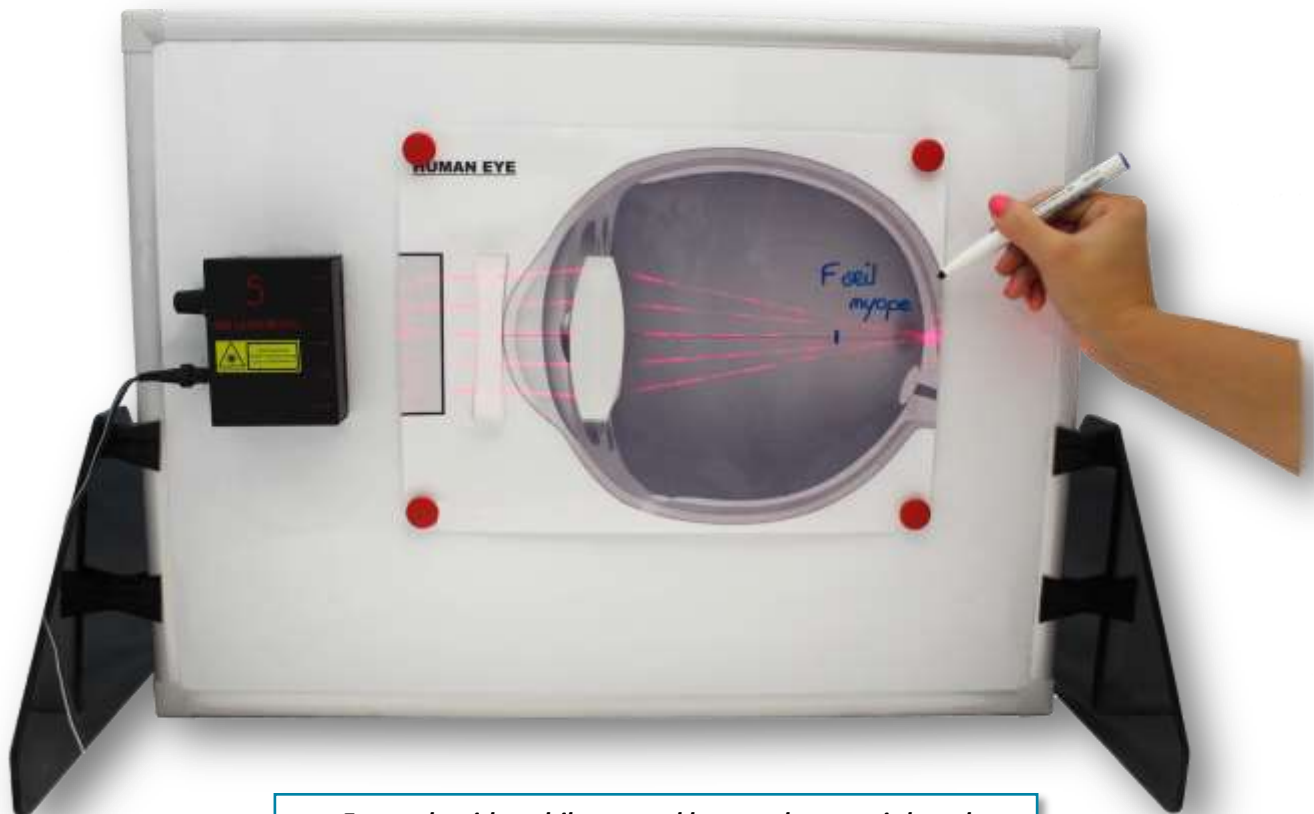

Examples of experiments

- Eye study, reflection refraction, geometric aberration, optics instruments.

Associated products

- Erasable magnetic board 600x400 – **DM230025**
- Multibeams red laser (available in red and green) – **DO108002**
- 3 beams red laser – **DO108018**

EXPERIMENTS

Eye study with multibeams red laser and magnetic board

Camera study with multibeams red laser and magnetic board
