

DM208012

Magnetic needle

Device to study magnetic fields.

School level

Junior and senior high schools.

Technical features

Red and blue magnetic needle 100mm
On aluminium support Ø45x10mm
Counterweight balancing
Dimensions: 75 x Ø45mm
Weight: 25 g
Packaging: individual sachet.

Product advantages

- Easy to use.
- Easy to store.

Examples of experiments

- Variation of magnetic field.

Associated products

Helmholtz coils – **DE105008**
