

DE102010

Mono decade resistances x100Ω

Device to study RLC circuits.

School level

Junior and senior high schools.

Technical features

ABS black box with label
Rotary switch with 10 positions
Decade resistances of 100Ω:
Precision: 1%
Intensity max.: 70mA
Max. power supply: 50V
Security sockets Ø4mm
Dimensions: 117x 79 x 57 mm
Weight: 106 g
Packaging: individual box

Product advantages

- Light box, easy to handle.
- Customization available.

Examples of experiments

- Study of RLC circuits.
