

DO110011

Semi cylindrical lens

Lens to study reflection-refraction of a light beam.

School level

Senior high school.

Technical features

Accessory included in reflection refraction kit.
Semi cylindrical lens
Dimensions: Ø 200 x 12 mm
Weight: 220 g.
Packaging: individual sachet.

Product advantages

- The kit enables to study reflection-refraction **without optics bench**.

Examples of experiments

- Reflection/refraction
- Descartes' law
- Kepler's law
- Relation $n_1 \sin i_1 = n_2 \sin i_2$
- Calculation of liquid refraction index
